NRO REVIEW COMPLETED

AGENDA

PURCELL PANEL MEETING

4 - 5 June 1963

MEMBERS : Dr. Edward Purcell - Chairman
Dr. James Baker
Dr. Allen Donovan
Dr. Eugene Fubini
Dr. Richard Garwin
Dr. Edwin Land
Dr. Donald Ling
Dr. Arthur Lundahl
[Redacted] - Consultant
Mr. Eugene Kiefer - CIA Staff Support
[Redacted] - Executive Secretary

25X1

25X1

CONTRACTORS : Convair, Eastman-Kodak, Itek

4 June
0930

INTRODUCTION: Mr. John A. McCone, Director of Central Intelligence

I. Briefings

- A. Intelligence Requirements for Photographic Interpretation
(Mr. James Reber - Chrm., Committee on Overhead
Reconnaissance, United States Intelligence Board/Arthur C.
Lundahl - Director, National Photographic Interpretation
Center)
- B. Satellites - Existing systems, systems now programed, and
follow-on systems

SECRET

D. Aircraft

- (1) A-12 and AQ-12 (Drone) - Mr. Kiefer

II. Considerations for Panel Recommendations

A. Adequacy of current and proposed satellite systems

B. Research Areas

- (1) Satellite systems (guidance)
- (2) Cameras
- (3) Spectral response
- (4) All weather capability
- (5) Laser technology and applications
- (6) Improved film emulsions
- (7) Other recording media
- (8) Use of image intensifiers

C. Feasibility of direct read-out and anticipated resolution

D. Stabilization of satellites

25X1

III. Questions to which the Panel should immediately address itself

- A. Will the improved photographic satellites now programed produce reconnaissance photography adequate to meet our needs?
- B. What further developments in satellite photography are considered feasible and should be undertaken in the interests of developing a system which would be an

25X1

improvement over [] the LANYARD []
[] and very possibly would equal or exceed
the resolution attained in U-2 photography?

25X1

25X1

- D. What are the applications of A-12 drones, what quality photography is expected from them, and would their operating characteristics be such as to provide useful coverage in areas important to the security of the United States?
